Overview

- **Topic/focus:** Medicare
- **Year(s):** 2011 (other years are available but only 2011 data is loaded)
- **Source:** CMS
- **Study and sample characteristics:**
- **Universe:** Medicare Beneficiary
- **Variables:** 10,901 respondents across 67 tables
- **Access:** Private use database request access with Walter
- **Cost:** \$
- **Key web links:** <https://www.cms.gov/Research-Statistics-Data-and-Systems/Research/MCBS/index.html>
- **Summary:** The Medicare Current Beneficiary Survey (MCBS) is a continuous, multipurpose survey of a nationally representative sample of the Medicare population, conducted by the Office of Enterprise Data and Analytics (OEDA) of the Centers for Medicare & Medicaid Services (CMS) through a contract with NORC at the University of Chicago. The central goals of MCBS are to determine expenditures and sources of payment for all services used by Medicare beneficiaries, including co-payments, deductibles, and non-covered services; to ascertain all types of health insurance coverage and relate coverage to sources of payment; and to trace processes over time, such as changes in health status and spending down to Medicaid eligibility and the impacts of program changes, satisfaction with care, and usual source of care.

Table Descriptions

RIC K Key Record	RIC K Key Record
RIC A Administrative ...	<p>The BASEID Key Record file identifies the person interviewed. It is an 8-digit element, consisting of a unique, randomly assigned 7-digit number concatenated with a single-digit checkdigit. In addition to the BASEID, the KEY file contains the type of interview conducted and other variables for classifying the beneficiary. There is one record for each person who completed an interview.</p>
